PNP Pharmaceuticals Inc. Receives GMP for Sport™ Registration from NSF International

BURNABY, British Columbia, Canada – PNP Pharmaceuticals Inc., a contract manufacturer of nutraceutical and OTC drugs, recently received Good Manufacturing Practices (GMP) for Sport™ registration from NSF International. Part of NSF's Dietary Supplement Certification Program, the GMP for Sport™ registration minimizes the risk that sports nutrition products contain banned substances.

NSF's GMP for Sport™ Program enables manufacturers working within the sports supplement industry, such as PNP Pharmaceuticals, to emphasize quality and increased brand credibility. GMP for Sport™ registration verifies PNP Pharmaceuticals' facility and operations, as well as ingredient sourcing are in compliance with GMP requirements via ongoing audits.

“The NSF GMP for Sport™ registration takes PNP Pharmaceuticals' existing GMP registration under NSF's Dietary Supplement Certification Program a step further, demonstrating their continued commitment to sports nutrition,” said Ed Wyszumiala, General Manager of NSF's Dietary Supplements Certification programs.

PNP Pharmaceuticals' President & CEO, Glen North says, “PNP's commitment to manufacturing excellence is never ending. Obtaining GMP for Sport™ registration from NSF International is essential to continue our role as industry leaders in *certified* quality. Our customers have come to expect an unrivaled level of quality from PNP Pharmaceuticals, and NSF for Sport™ registration is further evidence of our commitment.”

For obtaining NSF GMP for Sport™ registration, PNP Pharmaceuticals may use the [NSF GMP for Sport™ mark](#) in advertising and collateral materials.

About PNP Pharmaceuticals:

PNP Pharmaceuticals Inc. is one of Canada's leading contract manufacturers of solid dose nutritional supplements and OTC drugs (<http://www.pnppharmaceuticals.com>). Privately owned and located in Burnaby, B.C., Canada, PNP is widely recognized as the industry's most accredited contract manufacturer.
